

City of Marine City  
Safe Drinking Water Project  
**SPECIAL** Construction Update for JULY 3, 2025

Construction crews will be completing water main and service line tie-ins on Thursday July 3, 2025, on the following streets:

N. 2<sup>nd</sup> Street  
Pittsburgh Street

A reminder that when service connections to the new mains as well as individual new water service connections are being undertaken residents are likely to experience water service disruptions while connections are made. The time needed to complete these connections will vary depending on many factors, however service outage times could be as few as several hours to all day again depending on complexity and unforeseen circumstances. During these times, the water service will not be available until the new connections are complete.

Also, a reminder that the project contractor is responsible for maintaining streets in a drivable/passable condition daily and will make necessary repairs to ensure these conditions. If you experience any issues, please let the City know as soon as possible.

- **RUBBISH COLLECTION**-Emterra has been instructed to continue curb collection service within work areas and the contractor will work to allow for continued access on collection day. If residents have homes located on or near the corner lots, we ask that you consider placing your containers on the adjacent side street, if possible, to reduce the possibility of a missed collection. If for some reason your trash is not collected, please contact the DPW direct at **810-765-9711** and we will make accommodations to have your container(s) emptied.
- **SERVICE INTERRUPTIONS**- If you experience water service issues, please contact the DPW Office or City Hall Direct by calling **810-765-9711 (DPW) or 810-765-8846 (City Hall)**. If the event occurs outside of normal workday hours (Monday-Friday 7:30am-4:30pm), please call the **St Clair County Central Dispatch non-emergency** line at **810-985-8115**
- **WATER DISCOLORATION**- If you experience any water discoloration, we recommend running the cold water in the laundry tub or bathtub for about five minutes until the water appears clear. It is recommended that you wait for the water to clear before washing clothes or dishes. The discolored water presents no health hazards. It may, however, look cloudy or rusty. Under these conditions, even though the water is discolored and may have some sediment, the water still contains chlorine residual and is safe. If, for any reason, you suspect that your water is unsafe, please call the **Department of Public Works at 810-765-9711** so our crews can investigate.

- **PROPERTY RESTORATION-** Included in this project is the restoration of lawns disturbed as part of the construction. This work will be completed after all the underground and street work is finished. If you experience any excessive disturbance to your property, please notify the City so we may contact the contractor.

If you experience any unusual construction issues or have general questions regarding the project, please contact the City by calling 810-765-8846 during normal workday hours. For regular updates on this project, visit our website at <https://www.cityofmarinecity.org/DWSRFProject>
